## Alphabet

Kit Johnstone Tyabandha, Ph.D.

A modelling of alphabet must be isomorphic. Croatian already using the Roman alphabet our isomorphic alphabet for it was derived directly from it. Sticking to the official and accepted tradition of syntax, the following is a simplification of last year's work for engineering purposes.

**Alphabet**.

$$\left\{\begin{array}{cccccccccc} a & b & c & \c{c} & \acute{c} & d & \underset{\sim}{d} & \dot{d} & e & f \\ g & h & i & j & k & l & \tilde{l} & m & n & \tilde{n} \\ o & p & r & s & \c{s} & t & u & v & z & \c{z} \end{array}\right\}$$
